Waste Aggregates	6

Water Data

Data about production and domestic water use is collected in the Water section of FEM separated by facility type.

Domestic water use is either reported as a part of production use, in the case that a facility cannot separate the water usage, or separately.

You can determine whether a facility is reporting water values split between domestic and production or combined by looking at the `ref_id_wattrackdomprodsep` an answer of `No` means the facility is reporting combined (row 3 in the table below) and `Yes` means separated (rows 1 and 2 in the table below). Because a facility will never report using both methods they may safely be summed without risk of double counting.

Raw water use is reported in the follow `ref_ids`:

Scope	Usage	Unit of Measure
Domestic	<code>wattrackdom[1]quant</code>	<code>wattrackdom[1]unit</code>
Production	<code>wattrack[1]prod[2]quant</code>	<code>wattrack[1]prod[2]unit</code>
Domestic & Production	<code>wattrack[1]all[2]quant</code>	<code>wattrack[1]all[2]unit</code>

Where the wildcards `[1]` and `[2]` represent the water source and facility type which may be any of the following values:

Index	Kind	Reference	Value
1	Water Source	<code>watssourcesurface</code>	Surface Water
1	Water Source	<code>watssourceground</code>	Groundwater
1	Water Source	<code>watssourcemunicipalblue</code>	Municipal Blue Water
1	Water Source	<code>watssourcemunicipalunk</code>	Municipal Water (Origin Unknown)
1	Water Source	<code>watssourcesea</code>	Brackish surface water/seawater
1	Water Source	<code>watssourcecond</code>	Condensate from External Steam Source
1	Water Source	<code>watssourcerain</code>	Rainwater
1	Water Source	<code>watssourcemunicipalgrey</code>	Municipal Grey Water
1	Water Source	<code>watssourcerecycle</code>	Recycled Water
1	Water Source	<code>watssourcereuse</code>	Reuse Water
1	Water Source	<code>watssourcewaste</code>	Treated Wastewater from External Source
1	Water Source	<code>watssourcewasteinternal</code>	Untreated Wastewater from External Sources (treated internally)
1	Water Source	<code>watssourcesurface</code>	Surface Water
1	Water Source	<code>watssourceground</code>	Groundwater
1	Water Source	<code>watssourcemunicipalblue</code>	Municipal Blue Water
1	Water Source	<code>watssourcemunicipalunk</code>	Municipal Water (Origin Unknown)
1	Water Source	<code>watssourcesea</code>	Brackish surface water/seawater
1	Water Source	<code>watssourcecond</code>	Condensate from External Steam Source
1	Water Source	<code>watssourcerain</code>	Rainwater
1	Water Source	<code>watssourcemunicipalgrey</code>	Municipal Grey Water
1	Water Source	<code>watssourcerecycle</code>	Recycled Water
1	Water Source	<code>watssourcereuse</code>	Reuse Water
1	Water Source	<code>watssourcewaste</code>	Treated Wastewater from External Source

Index	Kind	Reference	Value
1	Water Source	watsourcewasteinternal	Untreated Wastewater from External Sources (treated internally)
2	Facility Type	finalProductAssembly	Finished Product Assembler
2	Facility Type	printingProductDyeingAndLaundering	Finished Product Processing (Product Printing, Product Painting, Product Dyeing, Product Laundering and Product Finishing, Embroidery & Embellishments)
2	Facility Type	hardComponentTrimProduction	Component / Sub-Assembly Manufacturing (incl Packaging) (e.g. Label, Zipper, Snap, Button, Elastic Buggie, cardboard, etc)
2	Facility Type	materialProduction	Material Production (Raw and intermediate materials are transformed into their final state before assembly) (e.g. Fabric dye-house, Fabric manufacturer, Yarn Dyeing, PCB manufacturer, etc)
2	Facility Type	rawMaterialProcessing	Raw Material Processing (Raw Materials are processed into intermediate material products) (e.g. Yarn Spinning).
2	Facility Type	rawMaterialCollection	Raw Material Collection & Bulk Refining (Materials are collected/extracted/farmed and refined to bulk commodity state) (eg. Cotton Farming and Ginning, processing of bottles, fabric scrap, etc.. into new recycled material)

So the raw value for usage of surface in Raw Material Collection & Bulk Refining for production would be found in either the ref_id `wattrackwatsourcesurfaceprodrawMaterialCollectionquant` OR

`wattrackwatsourcesurfaceallrawMaterialCollectionquant` the former if `ensourcetracksepdomprod` is Yes the latter if it is no and then combined with domestic water use but never both.

Water Aggregates

`[1]total`

Total liters of water across all facility types, and domestic usage from the water source represented by the wild card `[1]`

`domestic_total_water_l`

Total water use from domestic usage across all sources.

`watsourcewithdrawal`

Total liters of water across all facility types, and domestic usage from the water sources:

```
watsourceground
watsourcemunicipalblue
watsourcemunicipalunk
```

`watsourcerecycled`

Total liters of water across all facility types, and domestic usage from the water sources:

```
watsourcemunicipalgrey
watsourcecond
```

```
watsourcerecycle
watsourcereuse
watsourcewaste
watsourcewasteinternal
```

watsourcetotaltotal

Total water use across all sources, facility types, and domestic use.

[2]_water_l

Total liters of water used across all sources for the facility type represented by the wild card [2]

[2]_water_l

Total liters of water used across all sources for the facility type represented by the wild card [2]. Includes domestic usage added evenly across each facility type.

[2]_normalized_water_l

Total liters of water used per unit produced across all sources for the facility type represented by the wild card [2]. Includes domestic and vehicle usage added evenly across each facility type. The unit total and unit of measure can be found in sipfacilityannualprodvolquant[2] and sipfacilityannualprodvolunits[2] respectively.

Waste Data

Data about waste generation is collected in the Waste section of FEM separated by hazardous and non-hazardous waste type. Unlike energy and water it is not reported by facility type.

Raw waste generation is reported in the follow ref_ids:

Scope	Usage	Unit of Measure
Hazardous	wstsourceh[1]quant	wstsourceh[1]unit
Non Hazardous	wstsourceh[1]quant	wstsourceh[1]unit

Where the wildcard [1] represents the waste source which may be any of the following values:

Index	Kind	Reference	Value
1	Non-Hazardous Waste Stream	textile	Textile Waste
1	Non-Hazardous Waste Stream	leather	Leather Waste
1	Non-Hazardous Waste Stream	rubber	Rubber Waste
1	Non-Hazardous Waste Stream	metal	Metal
1	Non-Hazardous Waste Stream	plastic	Plastic
1	Non-Hazardous Waste Stream	paper	Paper
1	Non-Hazardous Waste Stream	cans	Cans
1	Non-Hazardous Waste Stream	wood	Wood
1	Non-Hazardous Waste Stream	food	Food Waste
1	Non-Hazardous Waste Stream	glass	Glass
1	Non-Hazardous Waste Stream	cartons	Cartons
1	Non-Hazardous Waste Stream	foams	Foams (EVA, etc.)
1	Non-Hazardous Waste Stream	wastewaterTreatmentSludge	Pre-water Treatment Sludge (Non-Hazardous)
1	Non-Hazardous Waste Stream	general	General or unspecified waste

Index	Kind	Reference	Value
1	Non-Hazardous Waste Stream	slagnh	Slag (Non-Hazardous)
1	Non-Hazardous Waste Stream	other	Other
1	Hazardous Waste Stream	prodchemdrum	Empty chemical drums and containers (without proper cleaning)
1	Hazardous Waste Stream	prodfilmprint	Film and Printing Frame
1	Hazardous Waste Stream	prodsludge	Pre-water Treatment Sludge (Hazardous)
1	Hazardous Waste Stream	prodchem	Expired/unused/used chemicals (waste oil, solvents, reactants, etc.)
1	Hazardous Waste Stream	prodcompgas	Compressed gas cylinders (refrigerants, etc.)
1	Hazardous Waste Stream	prodcontammat	Contaminated materials
1	Hazardous Waste Stream	dombatteries	Batteries
1	Hazardous Waste Stream	domflolight	Fluorescent light bulb
1	Hazardous Waste Stream	dominkcart	Ink cartridges
1	Hazardous Waste Stream	domoilgrease	Waste oil and grease (from cooking)
1	Hazardous Waste Stream	productionoil	Waste oil and grease (from production, maintenance, etc. - not cooking)
1	Hazardous Waste Stream	metalsludge	Metal Sludge
1	Hazardous Waste Stream	emptyother	Empty containers (cleaning, sanitizing, pesticides, etc.)
1	Hazardous Waste Stream	domelectronic	Electronic Waste
1	Hazardous Waste Stream	domcoalcomb	Coal combustion residuals (fly ash and bottom ash/coal slag)
1	Hazardous Waste Stream	slag	Slag (Hazardous)
1	Hazardous Waste Stream	other	Other

Waste Aggregates

Waste totals are converted to kilograms from the reported units and aggregations are provided in the following calculations:

`wstsourceTotalNonHaz`

Total kilograms of non hazardous waste.

`wstsourceTotalHaz`

Total kilograms of hazardous waste.

`wstsourceTotal`

Total kilograms of all waste, both hazardous and non hazardous.
